Question 1

You are working on a Smart Walk-Thru step for which there are two buttons a user could click to move forward in the process. After they click either button, the remainder of the process is the same. Which option below is the best way to address this?

A. Add a Custom Trigger with multiple conditions.
B. Use a SmartTip to let the users know they can click either button for the flow to continue.
C. Add a Peer Step.
D. Create a Split Step.

Answer A

Question 2

Which is the most preferred Unique User ID setting and the one you should explore first for UUID setup?

A. WalkMe ID
B. Cookie
C. Variable
D. jQuery

Answer C

Question 3

A brokerage firm is interested in implementing WalkMe to address an issue their customers face when transferring money from their online accounts to their banks.

They have heard that users do not know where to go on the platform to complete this, but once they reach the appropriate page, they know how to fill out the forms correctly without errors.

Of the listed WalkMe apps, which would best address the issue?

A. Resource to explain how to complete all parts of the process
B. Shuttle to bring the user to the page
C. SmartTips on the fields of the page
D. ShoutOut to announce that this must be completed

Answer B

Question 4
